**Damon System Orthodontic Photo Album**

Older style braces require elastics to hold arch wires in place.

Elastics are like *bungee cords* – they cause **friction** and **pressure**, making treatment slower and less comfortable.

Damon System braces use a *slide* mechanism that eliminates the friction and binding.

With the Damon System teeth move more freely and comfortably.

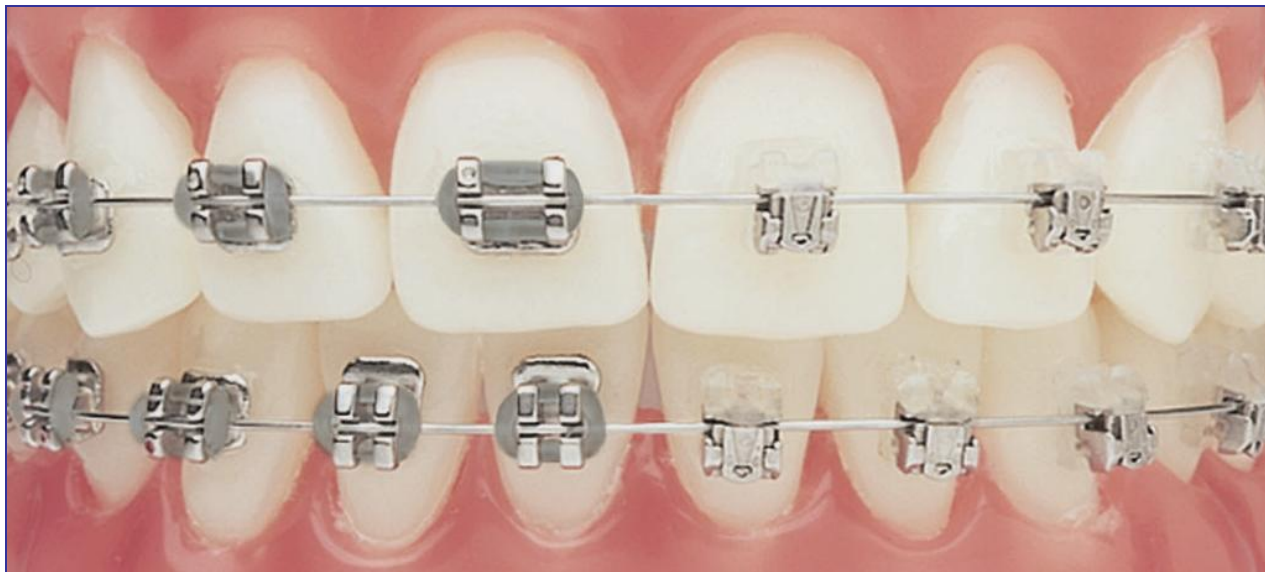

# Damon System braces are...

Smaller

More  
Comfortable

***Faster***

Traditional Braces

**Damon 3**

# What Makes the Damon System Different?

1. ***Passive self-ligating braces*** that are much more gentle to the teeth.
2. ***High-technology wires*** that move teeth much faster and require far fewer adjustments.
3. ***A new clinically proven treatment approach*** that aligns the teeth and enhances *facial aesthetics* – usually without extractions.

# Clinically Proven Advantages\*

- Significantly better results
- Significantly shorter treatment times
- Far fewer adjustments required

The following are photos of **actual people** treated with the **Damon System**

All were treated *without extractions, without rapid palatal expanders and without surgery.*

**DAMON**  
*System*

Please note that while all cases can be treated with the Damon System, most but not all can be treated without extractions, RPEs or surgery. Consult your orthodontist for details.

Time: 18 months  
Appointments: 11

Before

After

The results that can be achieved with orthodontics today are far better than just a few years ago. We can now create beautiful smiles and faces in about half the time, and now most often without extractions or rapid palatal expanders.

**DAMON**  
*System*

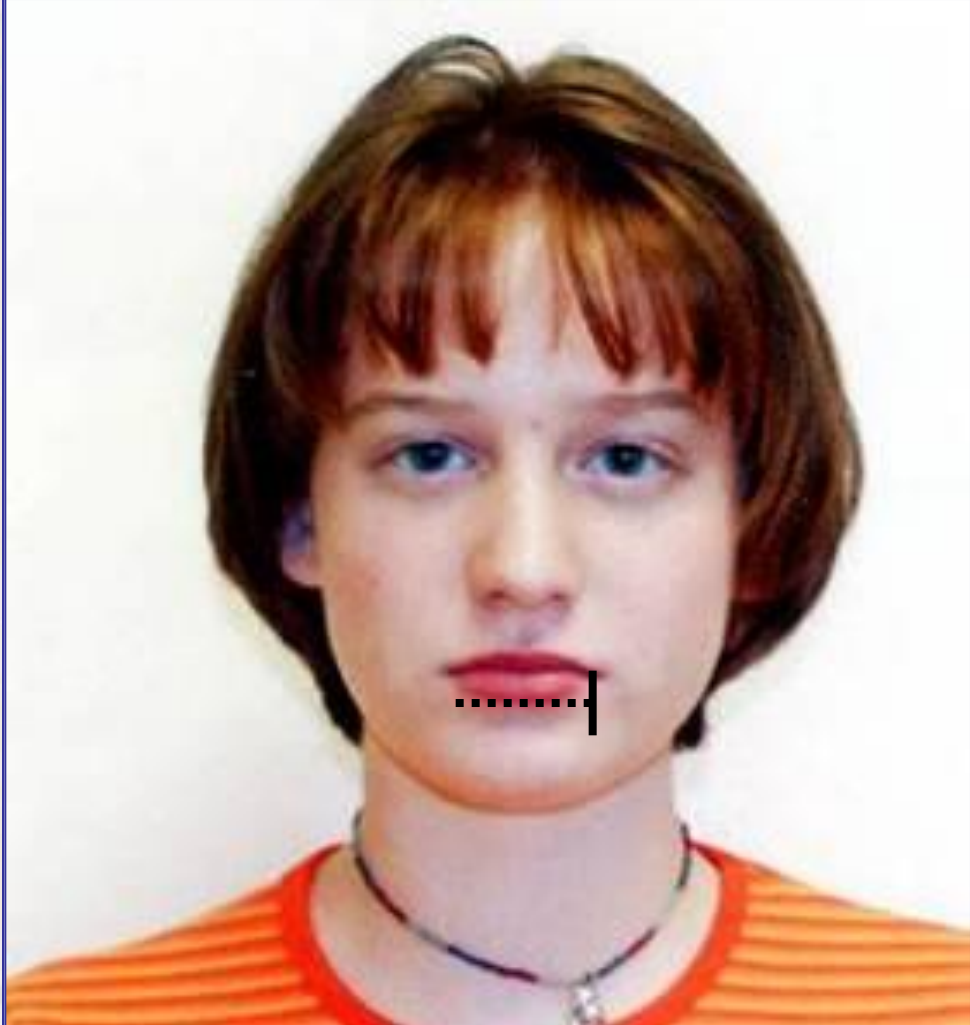

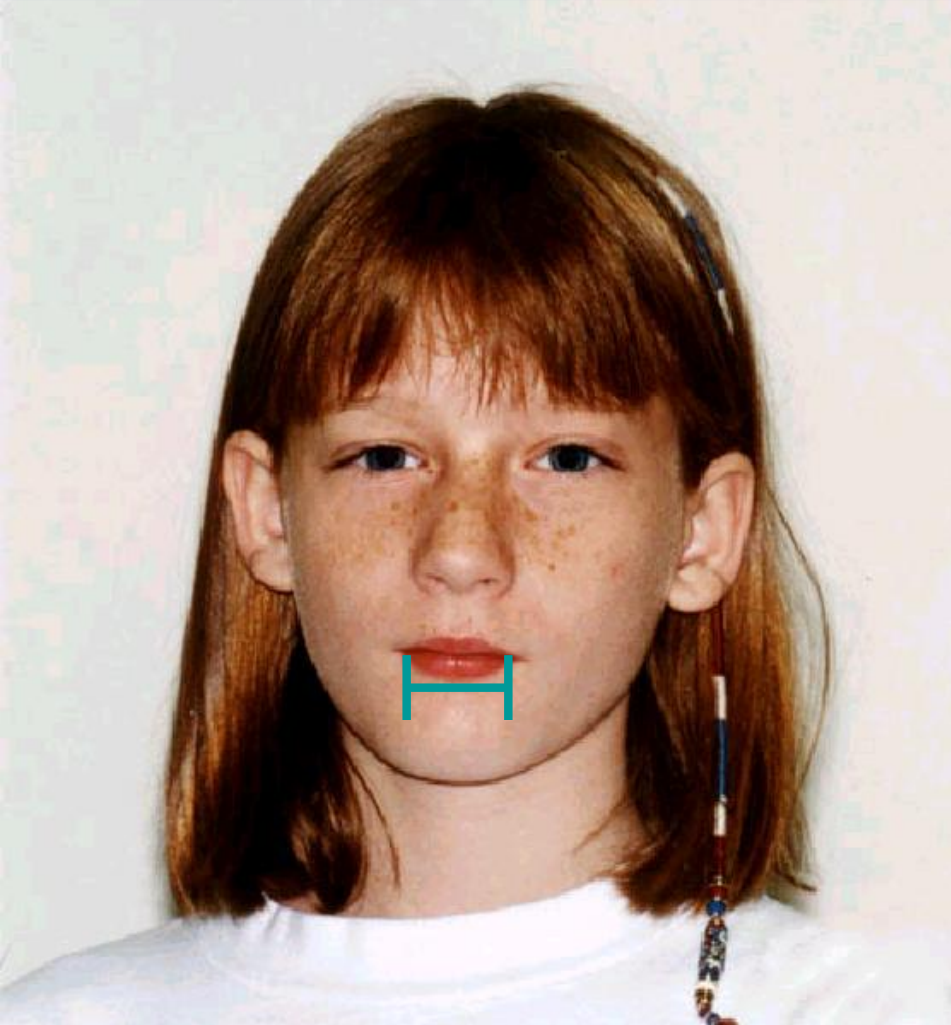

**Before**

**After**

**New research shows that in cases like this one, beautiful smiles are possible without extractions or rapid palatal expansion. Look how this full broad smile, achieved with Damon System, helped transform this young girl into a beautiful young woman.**

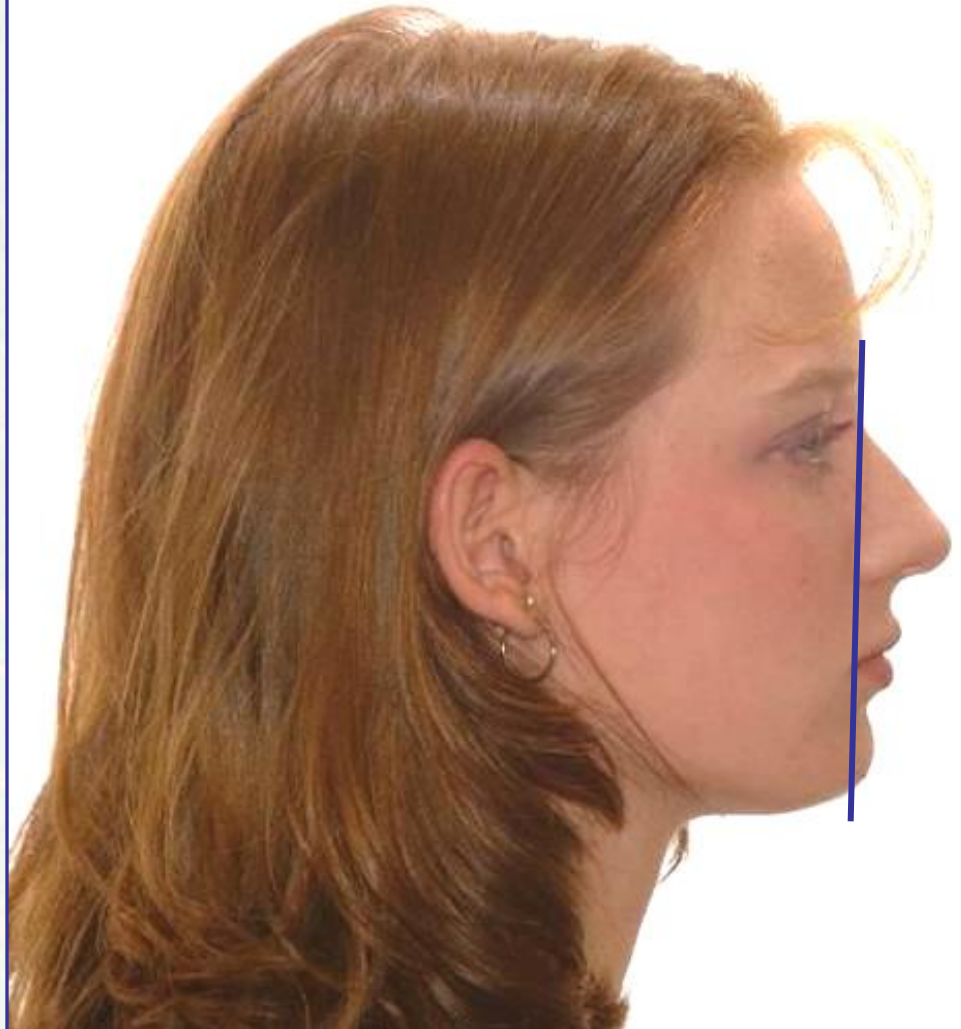

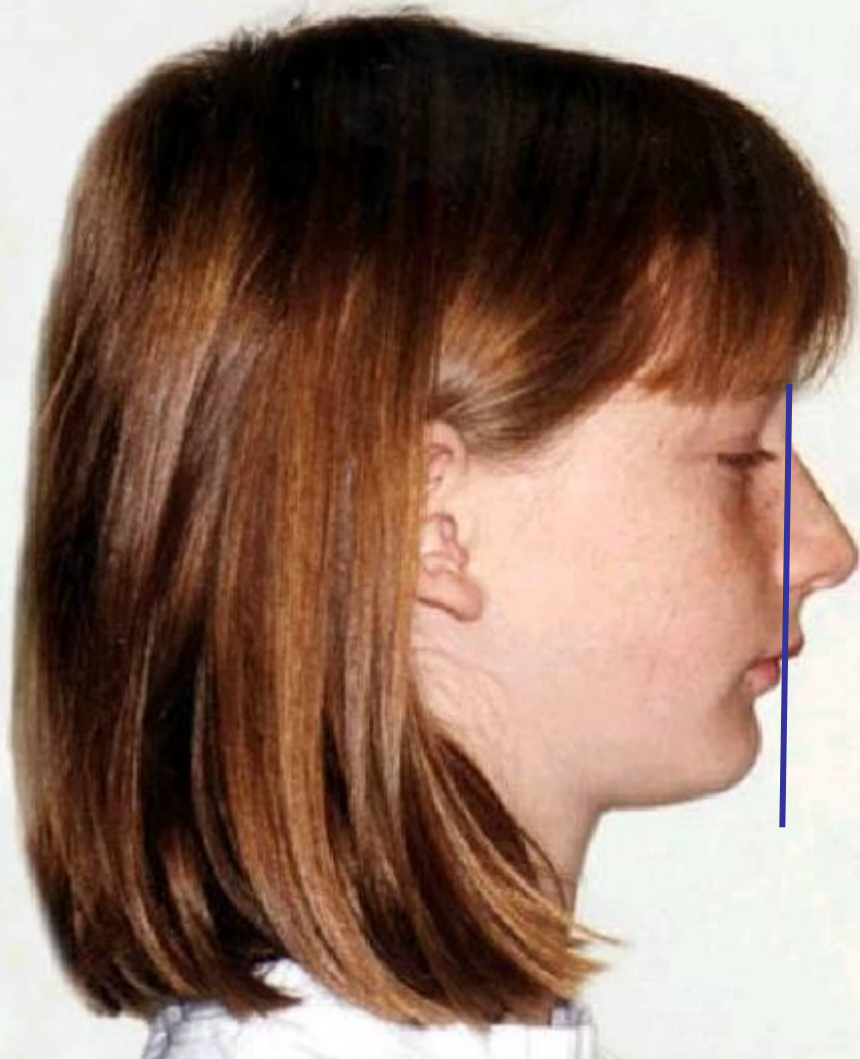

Before

After

Notice the additional facial width, achieved without surgery.

Before

...and a dramatically improved profile.

Treatment time: 22 months

**Before**

**After**

This young lady's teeth were very crowded, yet she ended up with a beautiful, stable result *without* extractions or rapid palatal expansion. This treatment approach takes into consideration how she'll look when she's in her 40s, 50s and beyond.

*“Now I look the way I  
always thought I  
should look.”*

Time: 17 months  
Appointments: 9

**Before**

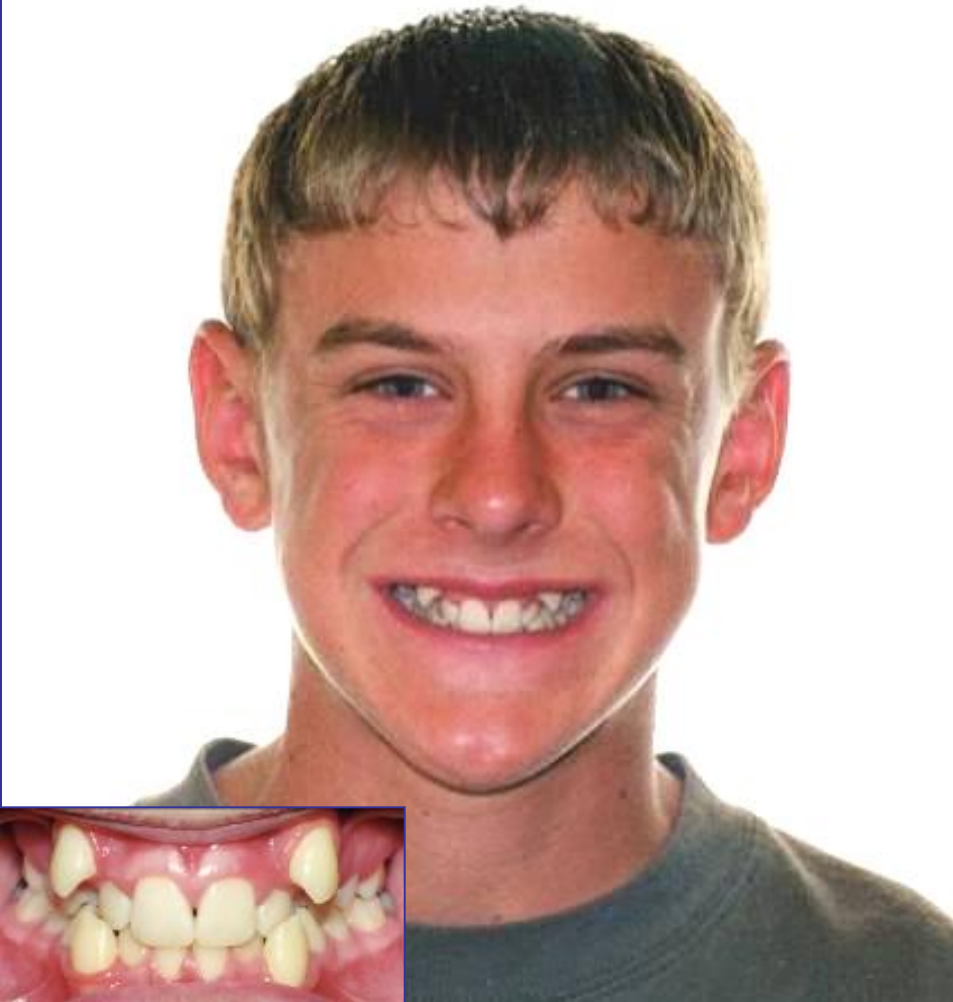

**After**

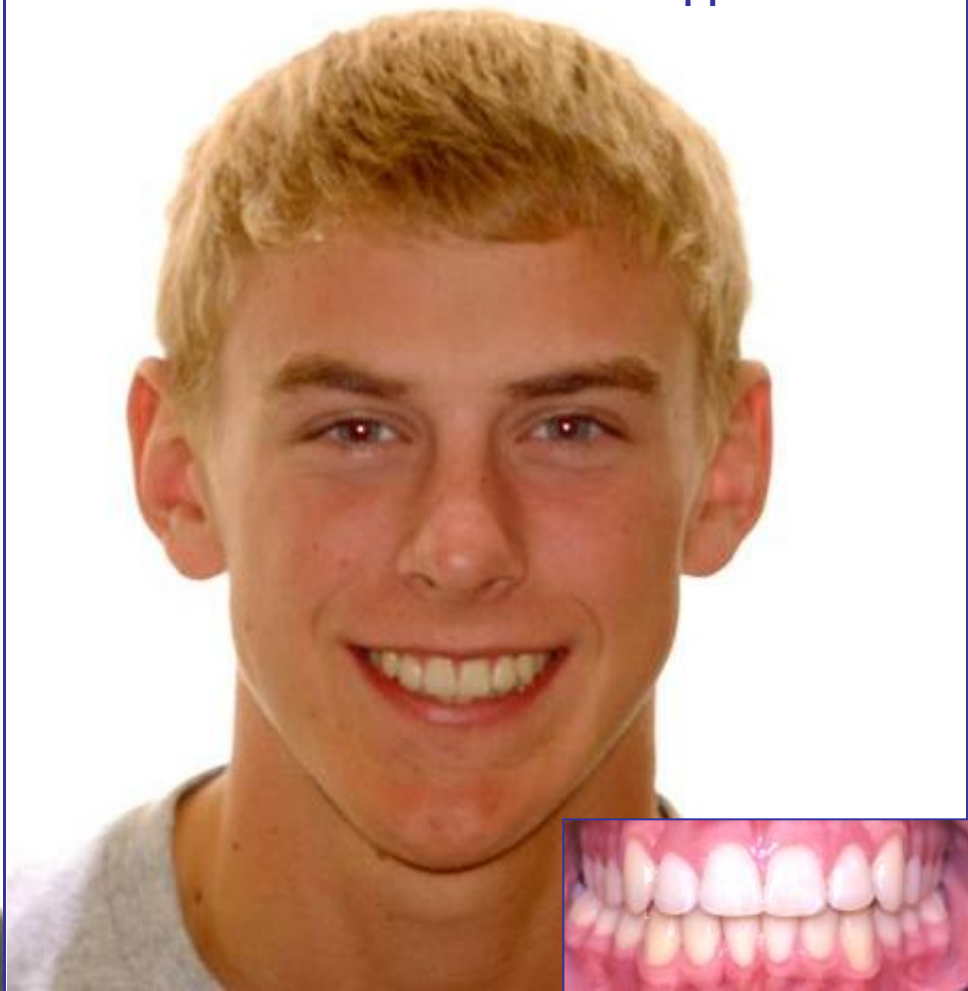

**With conventional braces, this case would have required painful extractions and/or a rapid palatal expander. With the Damon System she was treated without extractions or an RPE and achieved a stunning smile and beautiful facial symmetry.**

Time: 14 months  
Appointments: 7

Before

After

Research shows that a great smile and improved appearance add to a person's self-esteem and confidence – attributes that can enhance a person's life and lifestyle.

**Before**

**After**

**Many people see a noticeable change not just in their teeth, but in their entire face. We call this the “magic of the midface,” a beautiful smile and a look that’s youthful and dynamic.**

Time: 14 months

Appointments: 8

**Before**

**After**

**Prior to treatment with the Damon System, this woman's teeth were relatively straight. However, look at the dramatic difference in her face at the end of her Damon System treatment.**

**Time: 18 months  
Appointments: 10**

**Before**

**After**

**This gentleman was amazed by the results of his orthodontic treatment. In addition to a dramatically improved smile, his teeth and surrounding tissue are now much healthier.**

Treatment time: 18 months

Appointments: 11

**Before**

**After**

**This is an excellent example of how orthodontics means a lot more than just beautiful straight teeth. Notice how a full arch form and broad smile enhance this woman's appearance, and give her a much more youthful look.**

**Q & A**

# Are **DAMON**<sup>™</sup> Braces Right For You? *System*

- **Are all braces the same?**

With the Damon System, we don't just align the teeth. We create beautiful smiles accounting for a patient's face, profile and other factors in anticipating what they will look like in their 40s, 50s and beyond to deliver results for a lifetime.

# Are **DAMON**<sup>™</sup> Braces Right For You? *System*

- **How long does treatment take?**

Depending on your case, treatment time with the Damon System is up to 50% faster than with conventional braces. Another benefit – far fewer appointments are required during treatment.

## Are **DAMON** System Braces Right For You?

- **Since the Damon System works so quickly, does that mean it is harsh or unsafe?**

No. In fact, what makes the Damon System work so quickly is that it uses far gentler, more biologically sensible forces than conventional braces. The low-friction nature of the system assures improved tooth position and improved facial harmony.

# Are **DAMON** System Braces Right For You?

- **Will my teeth hurt after adjustments?**

Very light “shape memory” titanium wires are used that gently guide your teeth to their ideal position. Many people experience very little discomfort.

# Are **DAMON**<sup>™</sup> Braces Right For You? *System*

- **Aren't braces big and bulky?**

Not any more! Braces are much smaller than they were just a few years ago, and new materials are now used that make them very discreet.

- **What about adult treatment?**

No problem. Adults can be treated quickly, easily, and most importantly, to a high-quality result.

The things being accomplished with the

**Damon System** ...  
are beautiful!
